

IcePlus

The Jofemar vending machine FOR ALL SIZES of ICE CREAM and FROZEN FOOD products.

Quality manufacturing techniques result in an airtight storage chamber, which guarantees proper refrigeration and temperature maintenance.

Guaranteed ergonomics thanks to pushbutton and product exit located at a height appropriate for any user (adults, children, and the disabled).

Variable configuration ensures greater capacity and product diversity.

Technical characteristics

Up to 10 trays with 2, 3 and 4 different selections on each. Merchandises from 1 to 40 different products.

Automatic defrost systems, avoids ice blocks obstructing the air circulation

Flexible programming to match up the slots, selections and prices: it allows linking several channels to one only selection. It dispenses products alternatively.

Motorized product dispensing door for a perfect closing and isolation of the cabinet.

FIFO inventory management for dispensing product, even when channels are joined together.

Intelligent control of the mechanisms position by means of fotosensors.

Continuous auto-testing of the operational status.

Intelligent control of the product' expiry date. It can be programmed in two ways: By the expire date or by temperature loss inside of the cabinet.

Individual product expiry date; it avoid to dispense that product.

All the products, in the event of a power supply cut off and when product has reached a high temperature for long time.

Horizontal channel dispensers by means of plastic pushers and width product adapters; adjustment doesn't require tool.

Power supply 220-240 VAC.

Max. power consumption 1050 Wats (only reached on defrost moments)

Dimensions and weight

Dimensions: 1923 (1830 con apollos de metal) x 1045 x 921.5

Weight: 440 Kg

Structure

Exterior in 1.5-mm thick galvanised steel, with corrosion- and rust-protection.

Expanded polyurethane thermal insulation.

Three-anchor point support plate closure with safety lock and crowbar-proof strip.

Large-capacity vault.

Cash-credit management

Vending protocols MDB or Executive.

Change giver with 5 tubes for more flexible change combination.

Advanced coin validator with the most reliable systems to detect frauds and fake coins.

Programming and management

On site programming facilities with built modules.

Cloning machine options with handheld device.

Remote programming, data extraction, out of product alarm on real time, and more options using Jofemar telemetry software "Vending Track"

Data retrieval for audits and statistics.

Options

Bill Validator BT10.

Cashless payment system J130.

Vandal- proof coins entry.

Modem interface for telemetry management.

Online working mode with full control of sales and users.

Battery kit, on case of power off it will send a call to a programmed mobile phone.
