

# H20

HOPPER

Perfect payment  
control

The Jofemar H20 Hopper is compatible with most recreational machines and guarantees maximum reliability in prize output. Additionally, it offers the highest features regarding durability, robustness and delivery speed. Thanks to its easy operation and versatility, it is adaptable mechanically and electronically, to the most common machine models.

**FEATURES**

- Capacity: 800 1 EURO coins. It can include enlargement accessories to obtain a higher capacity.
- Speed: up to 6 coins per second.
- Jam-prevention hopper.
- Coin output detection simple sensor (double sensor option).
- Mechanically compatible with most machines on the market.
- Cascade step channel to install in roll with other hoppers.
- Optional full and empty detection with several adjustment levels to optimise the fixed assets in the machines.
- Flash technology for updates. Programming option with switches.

**ACCESSORIES**

- Mechanical scale.
- Vertical extensions.
- Different canisters depending on coin capacity.

**VOLTAGE**

- Nominal 12-24 V.
- Normal current: 400 mA.
- Maximum current: 3A.
